

Minimize photobleaching

Workshop “Advanced Fluorescence Microscopy”

Find out what the state of art in microscopy can do for you

Venue: Saarland University, Anatomy & Cell Biology,
building 61.4, room 0.24, Homburg, Germany

Date: 11th - 12th March 2010

Time: 09:00 to 17:30 - please reserve individual time slots

We are looking forward to seeing you. Please sign up for this seminar as soon as your time permits, as the number of participants is limited.

- Advanced methods **TIRF, FRET, FRAP, and Optical Sectioning in Real-Time, High Speed Calcium Imaging**
- Live demo with the recently introduced digital microscope **iMIC**, which **combines all fluorescence methods in a single unit**
- Save time, keep your cells alive and gather more meaningful data for publications

Feel free to contact us at below mentioned details in case you have questions on this workshop.
